

## Millau Viaduct, France

Citilog's solutions contribute to the safety and security of the users of the highest bridge in the world, Millau Viaduct (1,5 mile long and 800 feet high).

Automatic alerts notify Traffic Operators of any incident occurring on the Viaduct (vehicle stopped on the shoulder or on traffic lanes).

Outstanding performances and ease of use have been key factors to select Citilog. The system monitors fields of view of up to 1,500 feet.
